Why a Booster Seat?
Seat belts work for big people, but not for kids. They don't clamp down when cars crash. So a child could slip out of a seat belt in a collision. A booster seat makes the seat belt fit properly across the chest and lap - not the neck and tummy. Plus it helps kids see over the window!

A booster seat can help you stay safe while riding in a car

Click It Or Ticket

Remind everyone in your car to buckle up. Tell them a seat belt will save them in a crash. And right now, a seat belt will also save them from getting a ticket, because police are giving tickets to people who aren't buckled up. A ticket costs \$101. What could you buy with \$101?
